

a1 9. (New) The aqueous emulsion composition according to Claim 1, wherein said component (A) is an acrylonitrile-butadiene copolymer latex.

10. (New) The aqueous emulsion composition according to Claim 1, wherein said component (A) is a urethane resin emulsion.

11. (New) The aqueous emulsion composition according to Claim 1, wherein said component (A) is a natural rubber latex.

12. (New) The aqueous emulsion according to Claim 2, wherein said dispersing agent is an inorganic dispersing agent comprising triopolyphosphates or pyrophosphates or both.

13. (New) The aqueous emulsion according to Claim 2, wherein said dispersing agent is a polymeric dispersing agent comprising polycarboxylates or formalin-condensed naphthalenesulfonates or both.

14. (New) The aqueous emulsion according to Claim 2, wherein said crosslinking agent comprises sulfur or zinc oxide or both.

15. (New) The aqueous emulsion according to Claim 2, wherein said anti-foaming agent comprises mineral oil non-ionic surfactants, polydimethylsiloxane oils, ethylene-oxide- or propylene-oxide modified dimethyl silicones or emulsions thereof, mineral oils or acetylene alcohols.

16. (New) The aqueous emulsion according to Claim 1, wherein the polyisocyanate compound is a diisocyanate.

17. (New) The aqueous emulsion according to Claim 1, wherein the polyisocyanate compound is a triisocyanate.
